GDF 2 Hour Fire Rated For Paper Documents

NT FIRE 017 Fire Test

Independently tested to the most stringent international standards, the NT Fire 017 fire test originates from NordTest, the Swedish National Testing and Research Institute. Considered an industry standard, the SP testing lab in Sweden is one of the most highly regarded labs that performs this test.

NT FIRE 017-120 Paper: The safe is heated in a furnace for 2 hours to 1049° C. During this time, the internal temperature of the safe may not rise by more than 150° C. Safes in this category provide one hour of protection for paper by keeping temperatures below 177° C - the point at which paper chars or combusts.
